Lösung: Bedingungen mit komplexen Zahlen

a) $|z-(1+i)| = 1$

↑ alle Zahlen z, die einen "Abstand" 1 vom $(1+i)$ hat.

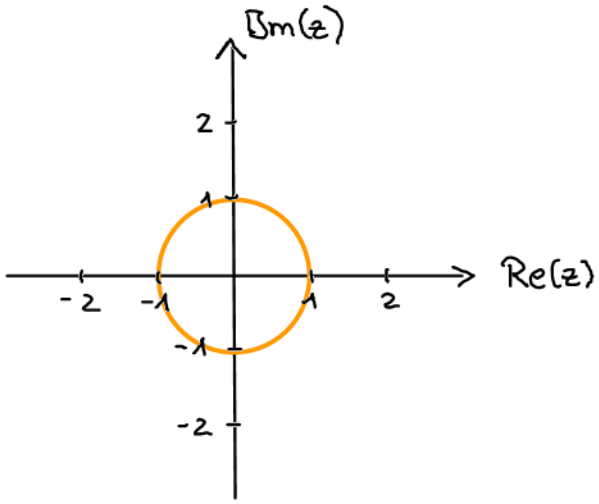

b) $\mathrm{Re}(z) \geq \mathrm{Im}(z)$

c) $z \cdot z^* = 1 \iff |z|^2 = 1 \iff |z| = 1$

↑ alle Zahlen z, mit Betrag 1

d) $z - z^* = 0 \iff \frac{z - z^*}{2i} = 0 \iff \mathrm{Im}(z) = 0$

$\iff \mathrm{Re}(z) = z$
