## Lösung: Addition & Substraktion von Vektoren

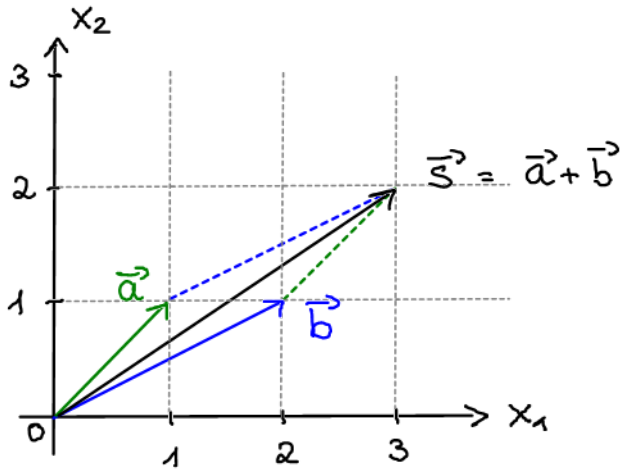

$\vec{a} = \begin{pmatrix} 1 \\ 1 \end{pmatrix}$

$\vec{b} = \begin{pmatrix} 2 \\ 1 \end{pmatrix}$

"Aufpunkt frei wählbar"

a) $\vec{s} = \vec{a} + \vec{b} = \begin{pmatrix} 1 \\ 1 \end{pmatrix} + \begin{pmatrix} 2 \\ 1 \end{pmatrix} = \begin{pmatrix} 3 \\ 2 \end{pmatrix}$

a) $\vec{s} = -2\vec{a} + \vec{b} = -2 \cdot \begin{pmatrix} 1 \\ 1 \end{pmatrix} + \begin{pmatrix} 2 \\ 1 \end{pmatrix} = \begin{pmatrix} -2+2 \\ -2+1 \end{pmatrix} = \begin{pmatrix} 0 \\ -1 \end{pmatrix}$
