Lecture Notes (Fill-in-the-Blank Version)

Prof. Dr. Alexander Baral

Mannheim University of Applied Sciences
Department of Mechanical Engineering

Semester WS 26/27

How to Use These Notes

These lecture notes are available both as a complete edition and as a fill-in-the-blank edition. Both editions have the same structure and cover the same mathematical material. In the fill-in-the-blank edition, selected results are replaced by writing lines or grids for working through longer calculations.

The notes accompany the lectures. Derivations, examples, and supplementary comments can be added directly in the spaces provided. Exercises and their discussion form a separate component of the course.

These notes are prepared for courses at Mannheim University of Applied Sciences. Feedback on typographical errors or mathematical ambiguities is always welcome.

Greek Alphabet

Recommended Reading

1 Fundamentals **1**

Greek Alphabet

Uppercase	Lowercase	Name	Uppercase	Lowercase	Name
A	α	alpha	N	ν	nu
B	β	beta	Ξ	ξ	xi
Γ	γ	gamma	O	o	omicron
Δ	δ	delta	Π	π	pi
E	ϵ	epsilon	P	ρ	rho
Z	ζ	zeta	Σ	σ	sigma
H	η	eta	T	τ	tau
Θ	θ	theta	Υ	υ	upsilon
I	ι	iota	Φ	ϕ	phi
K	κ	kappa	X	χ	chi
Λ	λ	lambda	Ψ	ψ	psi
M	μ	mu	Ω	ω	omega
